

MEETING THE PROJECT MANAGEMENT CHALLENGE

2004

Abstract

“Proactive Communication Methods for Project Managers”

Jay Ress, PMP

Proactive communication is assertive, honest, and focused on objectives. It keeps the project manager in front of the curve, enabling teamwork, effective decisions, and accountability throughout the project. It allows the project manager to fulfill his or her leadership role, actively pursuing project objectives from a position of strength rather than a “reactive” position of weakness. The PMI PMBOK Guide states that communication “...provides the critical links among people, ideas, and information that are necessary for success...” This presentation will show you how to create and leverage these “critical links”.
